

THANACHIT SENGSALEE

DATA ENGINEER · GCP DATA PLATFORMS · BATCH & STREAMING PIPELINES

Hat Yai, Thailand | +66 92 893 8956 | thanachit02185@gmail.com | linkedin.com/in/thanachit-sengsalee | benz.sengsalee.dev | youtube.com/@benzondataen

SUMMARY

Data Engineer with 4+ years building and operating batch and streaming pipelines on Google Cloud — BigQuery, Dataflow, and Airflow — from ingestion and modeling through orchestration, data quality, and cost tuning.

TECHNICAL SKILLS

Cloud & Data	Google Cloud Platform · BigQuery · Dataflow · Airflow / Composer · Cloud Run · Data Modeling · ETL & ELT
Programming	Python · SQL · TypeScript · JavaScript · Kotlin · .NET
AI & ML	Gemini · Vertex AI · Document AI · BigQuery ML · RAG · Vector Search · LSTM · LightGBM
Full-Stack	React · Next.js · Node.js · Express · React Native · Flutter · Tailwind CSS
Platform & Ops	Docker · Kubernetes (GKE) · CI/CD · Cloud Monitoring · MongoDB · PostgreSQL · MSSQL

PROFESSIONAL EXPERIENCE

Myorder Intelligence Co., Ltd. — Data Engineer Remote · Aug 2024 – Present

- Own the GCP data platform end to end, consolidating fragmented operational sources into one governed BigQuery warehouse.
- Cut warehouse spend and pipeline latency by re-architecting nightly full-table ETL into partitioned, incrementally-loaded ELT models orchestrated in Cloud Composer with Dataflow streaming ingestion.
- Shipped GenAI into production workflows: Document AI capture, Gemini on Vertex AI for RAG, and BigQuery ML forecasting.
- Eliminated silent data failures with automated quality, freshness, and schema-drift checks on OpenMetadata lineage, alerting upstream of executive dashboards.

JIB Digital Consult — Software Engineer Remote · Sep 2023 – Jul 2024

- Delivered client web and mobile products to fixed consulting deadlines in TypeScript, Next.js, React Native, Flutter, and Kotlin.
- Designed and integrated REST APIs across MongoDB, MSSQL, and PostgreSQL, standardizing contracts and error handling so front-end teams shipped without backend rework.
- Raised release reliability across cross-functional squads by enforcing shared code standards and review workflows on GitLab, GitHub, and SVN.

Intelligent Automation Research Center — Full-Stack Developer On-site · Jun 2022 – Sep 2023

- Scaled the E-Merchant platform to 30+ active business users and shipped E-OnlineShop v2 on Node.js, React.js, and MongoDB, owning schema design through deployment.
- Cut long-term maintenance cost by consolidating three product stacks into the unified E-Factory platform on shared services and one data model.
- Mentored junior developers and delivered system training to entrepreneurs as an invited guest speaker.

Intelligent Automation Research Center — Front-End Developer On-site · Jul 2021 – Jun 2022

- Co-built the E-Accom accommodation platform in Next.js, launched at Kittipoomhill Resort and replicated to more properties.

EDUCATION

Prince of Songkla University — M.Eng., Computer Engineering Sep 2022 – Present · GPA 3.83 / 4.00

Thesis: Hybrid inventory forecasting with stacking-ensemble learning — SARIMAX + LSTM + LightGBM.

Prince of Songkla University — B.Eng., Computer Engineering Jul 2017 – Apr 2021

CERTIFICATIONS Google Cloud · 17 skill badges · 2026

Data & Analytics	Engineer Data for Predictive Modeling with BigQuery ML · Streaming Analytics into BigQuery · Multimodal Vector Search · BigLake & Dataplex
AI & GenAI	Enhance Gemini Capabilities · GenAI Apps with Gemini & Streamlit · Prompt Design in Vertex AI · Document AI at Scale
Infra & DevOps	Kubernetes on Google Cloud · Serverless Apps on Cloud Run · Cloud Functions · CI/CD Pipelines · Cloud Operations Monitoring
